Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

Mr. Antonelli discussed the differences between the present invention and the applied prior art. Specifically, applicant's position is that Schofield does not teach or suggest tapered slots. Mr. Dexter respectfully disagreed and maintains the position that the slots of Schofield appear to be tapered, and if not, such a modification would be obvious for at least the reasons described in the prior art rejection. Additionally, language was discussed to further distinguish the claimed invention over the prior art, specifically Schofield. For example, Mr. Dexter noted that each of the slots of the present invention appears to extend at least to the center of the head, and such is not disclosed in Schofield since there is a pivot joint at the center of the heads of Schofield. Also, language directed to the fact that the heads of the present invention are not connected together was discussed.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)
